Mathematica Scandinavica is a peer-reviewed journal in mathematics that has been published regularly since 1953. Mathematica Scandinavica is run on a non-profit basis by the five mathematical societies in Scandinavia. It is the aim of the journal to publish high quality mathematical articles of moderate length.

Each volume of Mathematica Scandinavica is published as 2 separate issues. Thus, 4 issues of 160 pages each are published every year. The index is included in the second issue of each volume. The first issue is expected to appear no later than the end of March, and the remaining issues follow at intervals of approximately 3 months.

Articles since 1953 available on the net

Access to articles from the latest 5 years is only possible for subscribers. Access to the electronic version is included in the subscription price. Issues older than 5 years are open to the public.

Subscribers must send their IP numbers or IP-ranges either to their book agents or directly to the journal to get access to the latest 5 years of Mathematica Scandinavica.
